

Mohamed Abdul Hameed

AI-Augmented Full-Stack Developer. Rapid Prototyping and LLM Workflows

Jeddah, Saudi Arabia. Open to remote worldwide. +966 59 018 8265

emah84@gmail.com, github.com/Mohamed-AH, linkedin.com/in/mojed7

Full-stack developer leveraging AI coding agents and spec-driven workflows to accelerate system delivery and automation. Engineered a Claude-API pipeline processing 3,300+ Oracle JDE work orders with a 90% reduction in manual handling time. Experienced in rapidly building live full-stack platforms using Claude Code, LLM APIs, object storage, and production monitoring. CKA and Oracle Cloud certified.

TECHNICAL SKILLS

AI and LLM tooling: Claude Code, spec-driven prompting, AI-assisted refactoring, Claude and Gemini APIs, output validation

Languages: JavaScript (ES6+), Python, Bash, Shell, HTML5, CSS3

Backend: Node.js, Express, REST APIs, MongoDB, OAuth, JWT

Frontend: Vanilla JS (ES modules), Three.js, WebGL, PWAs, real-time data visualization

Cloud and DevOps: Kubernetes (CKA), Docker, Oracle Cloud Infrastructure, Cloudflare Workers, Cloudflare R2, Git, CI/CD

Enterprise: Oracle JD Edwards EnterpriseOne

EXPERIENCE

ERP Operations & Automation Specialist, BT Applied Technology

Jeddah, Saudi Arabia. 2011 to Present.

- **AI-Driven Workflow Automation:** Designed and built a Python/JavaScript automation pipeline utilizing Claude API for PDF text extraction and field mapping, processing 3,300+ Oracle JDE work orders while cutting manual handling by 90%.
- **System Architecture and Validation:** Architected a 5-part pipeline incorporating PDF extraction, work-order creation, inventory processing, and document handling with automated validation, logging, and error-handling routines.
- **Operations and Project Support:** Managed core administrative logistics and document workflows, including BOQs, payment certificates, material submittals, MS Project schedules, and multi-party contractor correspondence, providing ongoing operational support alongside automated systems.

SELECTED PROJECTS

JDE Work Order Automation System **FLAGSHIP, PRODUCTION**

End-to-end automation suite combining LLM APIs, browser automation, and desktop scripting for complete JDE inventory processing. Deployed at BT Applied Technology.

Python, JavaScript, Claude API, AutoIt, VBScript

rasmihassan.com **BUILT AI-ASSISTED WITH CLAUDE CODE** rasmihassan.com, [source](#)

Architected and shipped a full-stack media platform hosting 3,200+ audio files and 300+ articles under full-text search.

Node.js, MongoDB, Google Auth, Cloudflare R2, OCI Storage, Sentry, Grafana

SpaceWiki **REAL-TIME 3D** [live demo](#), [source](#)

Client-side 3D tracking console rendering 12,000+ live satellites using WebGL and SGP4 orbit propagation.

Three.js, satellite.js, WebGL, Celestrak API

CERTIFICATIONS

Certified Kubernetes Administrator (CKA). Linux Foundation, 2025. [verify](#)

OCI Migration Architect Professional. Oracle, 2025. [verify](#)

OCI Networking Professional. Oracle, 2025. [verify](#)

OCI Generative AI Professional. Oracle, 2024. [verify](#)

EDUCATION

100Devs Software Engineering Bootcamp, 2022

Full-stack software engineering.
