

Mohamed Abdul Hameed

AI Automation Engineer. LLM Pipelines and Process Automation

Jeddah, Saudi Arabia. Open to remote worldwide. +966 59 018 8265

emah84@gmail.com, github.com/Mohamed-AH, linkedin.com/in/mojed7

Automation engineer operating at the intersection of LLM APIs and enterprise systems. Built a production Claude-API pipeline extracting PDF data and mapping fields directly into Oracle JD Edwards, processing 3,300+ work orders with a 90% reduction in manual handling time. Builds fault-tolerant Node/Python pipelines with validation logic, error handling, and production monitoring. CKA and Oracle Cloud certified.

TECHNICAL SKILLS

AI and automation: LLM API integration (Claude, Gemini), RAG architecture, LangChain (LCEL), vector search (pgvector, Cohere embeddings), PDF data extraction, field mapping, process automation, browser automation

Scripting and languages: Python, JavaScript (ES6+), VBScript, AutoIt, Bash, Shell

Backend and APIs: Node.js, Express, FastAPI, REST APIs, MongoDB, PostgreSQL, SQLAlchemy, OAuth, JWT

Cloud and DevOps: Kubernetes (CKA), Docker, Oracle Cloud Infrastructure, Cloudflare Workers, Cloudflare R2, Git, GitHub Actions CI, pytest, mypy

Enterprise: Oracle JD Edwards EnterpriseOne

EXPERIENCE

ERP Operations & Automation Specialist, BT Applied Technology

Jeddah, Saudi Arabia. 2011 to Present.

- **LLM Pipeline Engineering:** Designed and built an end-to-end automation pipeline (Python, JavaScript, AutoIt) integrating Claude API for unstructured PDF parsing and field mapping, processing 3,300+ JDE work orders at a 90% reduction in manual handling time.
- **Modular Pipeline Architecture:** Built a 5-component modular system covering document processing, work-order generation, material management, inventory reconciliation, and record archiving with complete validation and logging.
- **Operations and Domain Expertise:** Managed daily administrative logistics and document workflows, including BOQs, payment certificates, submittals, MS Project schedules, and contractor correspondence, using that domain knowledge to design accurate automation scripts.

SELECTED PROJECTS

JDE Work Order Automation System **FLAGSHIP, PRODUCTION**

Production enterprise automation combining LLM parsing, GUI automation, and inventory updates. Deployed at BT Applied Technology.

Python, JavaScript, VBScript, AutoIt, Claude API

ragchat **RAG KNOWLEDGE BASE** [source](#)

Retrieval-augmented Q&A service returning answers grounded in their source passages. PostgreSQL with pgvector holds both the text and the vector index, so there is no separate vector database.

Python, FastAPI, LangChain (LCEL), pgvector, Cohere embeddings, Gemini, Docker, pytest, mypy strict, GitHub Actions CI

rasmihassan.com **PRODUCTION PLATFORM** rasmihassan.com, [source](#)

Live platform hosting 3,200+ audio files and 116 PDFs under full-text search, with media served via Cloudflare R2 and Oracle Cloud.

Node.js, MongoDB, Google Auth, Sentry, Grafana

CERTIFICATIONS

Certified Kubernetes Administrator (CKA). Linux Foundation, 2025. [verify](#)

OCI Migration Architect Professional. Oracle, 2025. [verify](#)

OCI Networking Professional. Oracle, 2025. [verify](#)

OCI Generative AI Professional. Oracle, 2024. [verify](#)

EDUCATION

100Devs Software Engineering Bootcamp, 2022

Full-stack software engineering.
