

Mohamed Abdul Hameed

Full-Stack Developer. Node.js, Python, Vanilla JS, MongoDB

Jeddah, Saudi Arabia. Open to remote worldwide. +966 59 018 8265

emah84@gmail.com, github.com/Mohamed-AH, linkedin.com/in/mojed7

Full-stack and automation developer with 14+ years of enterprise operations experience. Turned core operational bottlenecks into a production pipeline that processed 3,300+ Oracle JD Edwards work orders with a 90% reduction in manual handling time. Experienced in shipping live Node.js/MongoDB platforms with OAuth, object storage, full-text search, and production monitoring. CKA and Oracle Cloud certified.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Bash, Shell, HTML5, CSS3

Backend: Node.js, Express, REST APIs, MongoDB, OAuth, JWT

Frontend: Vanilla JS (ES modules), Three.js, WebGL, PWAs, real-time data visualization

Cloud and DevOps: Kubernetes (CKA), Docker, Oracle Cloud Infrastructure, Cloudflare Workers, Cloudflare R2, Git, CI/CD

Automation: Python, browser automation, VBScript, AutoIt, LLM API integration (Claude, Gemini), PDF extraction

Enterprise: Oracle JD Edwards EnterpriseOne

EXPERIENCE

ERP Operations & Automation Specialist, BT Applied Technology

Jeddah, Saudi Arabia. 2011 to Present.

- **ERP and Workflow Automation:** Architected and deployed an end-to-end Python/JavaScript automation pipeline integrating Claude API PDF extraction to automate Oracle JDE work-order creation, quantity entries, and material issuances, processing 3,300+ work orders at a 90% reduction in manual handling time.
- **System Architecture and Reliability:** Built a 5-component modular pipeline handling PDF extraction, work-order creation, material management, inventory adjustments, and document archiving with automated validation, retry logic, and logging across all stages.
- **Operations and Project Support:** Managed core administrative logistics and document workflows, including BOQs, payment certificates, material submittals, MS Project schedules, and multi-party contractor correspondence, providing ongoing operational support alongside automated systems.

SELECTED PROJECTS

JDE Work Order Automation System **FLAGSHIP, PRODUCTION**

End-to-end automation suite for Oracle JDE work orders featuring PDF parsing, field mapping, inventory adjustments, and document handling. Deployed at BT Applied Technology.

Python, JavaScript, VBScript, AutoIt, Claude API, browser automation

rasmihassan.com PRODUCTION PLATFORM rasmihassan.com, [source](#)

Live platform hosting 3,200+ audio files, 116 PDFs, and 300+ articles with full-text search, Google Auth, Sentry, and Grafana monitoring.

Node.js, Express, MongoDB, Cloudflare R2, OCI Storage

SpaceWiki **REAL-TIME 3D** [live demo](#), [source](#)

Client-side 3D console tracking 12,000+ live satellites with real-time orbit propagation (SGP4) and interactive telemetry.

Three.js, satellite.js, WebGL, Celestrak API

CERTIFICATIONS

Certified Kubernetes Administrator (CKA). Linux Foundation, 2025. [verify](#)

OCI Migration Architect Professional. Oracle, 2025. [verify](#)

OCI Networking Professional. Oracle, 2025. [verify](#)

OCI Generative AI Professional. Oracle, 2024. [verify](#)

EDUCATION

100Devs Software Engineering Bootcamp, 2022

Full-stack software engineering.
